

1,000kg or 2,205lb Thermax Floform FIBC (Super Sac)

Pallet Length	Pallet Width	Pallet Height	Lift Straps	Spout Diameter	Spout Length
45"	45"	46"	10"	14"	25"
114 cm	114 cm	117 cm	25 cm	35.5 cm	63.5 cm

Our "Super Sacs" are heavy gauge polypropylene flexible intermediate bulk containers (FIBC), with UVA and AVB fabric protection.

These bags are water and weather resistant and are labelled on three sides for easy identification.

Internal baffles ensure the bag stays perfectly square and easy to handle and store. A protective top cover protects the bag from the elements as well as from potential damage due to stacking.

Cancarb FIBC's are a safe and convenient package for today's demanding industrial needs

NOT RECOMMENDED FOR OUTSIDE STORAGE
